3 August 1981

NOTE FOR: Director of Central Intelligence
VIA: Deputy Director of Central Intelligence
FROM: Stanley Sporkin
General Counsel
SUBJECT: Your ^{lunch} Breakfast With Director Webster on 4 August
1981

1. I recommend that you avoid discussion of the Executive Order 12036 revision with Director Webster at your breakfast with him on 4 August. He has raised three issues in his response to your personal note to him at the time the 29 June draft order was circulated to NFIC. We will likely be able to satisfy his concerns on two of these (the standard for reporting to the Intelligence Oversight Board and whether the order should mention DEA by name and address international narcotics matters). These two are among a variety of issues in the 29 June draft order raised by the Community and addressed in an issues paper which is nearly ready for your review.

2. The remaining issue concerns a statement of your general leadership and coordination authority within the Community. Since this issue concerns the role the DCI will play in the formulation and coordination of national counterintelligence policy, I recommend that you not discuss this subject until you have reviewed our issues paper, which contains three issues relating to counterintelligence.
